

How to start a crochet project

- Decide to crochet
- Configure what to make
- Determine what yarn materials
- Determine how much of yarn material is needed
- Acquire yarn
- Find what size hook is needed
- Get hook of desired size
- Grab tail of yarn
- Lay yarn tail over nook of needle
- Wrap yarn in a complete loop around needle
- Wrap same strand in a half succession around needle that will lay in nook cavity
- Pull through this half loop through original full loop of yarn
- Wind up with one loop on needle, adjust tension
- Wrap same strand in a half succession around needle that will lay in nook cavity
- ***Continue prior two steps in infinite repeat till width of desired pattern is achieved***
- To increase height, start next row by inserting hook with end loop into it's neighbor loophole
- With two loops currently on needle lay strand of of yarn in nook cavity
- Pull yarn strand in nook through both loops till the strand is now the only loop on needle
- Insert needle with loop through neighbor loophole
- With two loops currently on needle lay strand of of yarn in nook cavity
- Pull yarn strand in nook through both loops till the strand is now the only loop on needle
- ***Continue prior three steps in infinite repeat till width of desired pattern is achieved***
